

Information about ISF-3 and ICARP2019 international conferences

3rd International Solar Fuels Conference (ISF-3) and International Conference on Artificial Photosynthesis (ICARP2019) will be held at Hiroshima Convention Hall on November 20-24, 2019. This conference combines two conferences ISF-3 and ICARP2019. ISF-3 conference has been held every two years since the first one in Sweden in April 2015, and ICARP2019 is the third conference since the first one was held in November 2014 in Hyogo Prefecture.

ISF-3 and ICARP2019 will be preceded by a feature two-days conference ISF-3 Young (Nov. 19-20, 2019), organized and participated by young scientists and students.

These conferences will provide an excellent platform for presenting state-of-the-art results, discussions and exchange of ideas in all areas related to natural and artificial photosynthesis.

In ISF-3/ICARP2019 conference, Prof. Kazunari Domen, a leading expert in hydrogen production using semiconductor photocatalysts will make a plenary speech, and many members of the off-campus steering committee of Research Center for Artificial Photosynthesis (RECAP) will present keynote and invited lectures. The members of International Steering Committee of RECAP, Dr. Etsuko Fujita, Prof. Licheng Sun and Prof. Michael Wasielewski will make Keynote speeches, and Prof. Yutaka Amao, director of ReCAP will make an invited speech. In addition, many researchers present their recent works for artificial photosynthesis. The following is the details.

At ISF-3 Young conference, young researchers including students and postdoctoral researchers are encouraged to make oral presentations. We look

forward to your participation.
